Our Vision

We envision to lead the global tech world through abstract service in optimizing online visibility and digitalization of every single business: start-up, SME or large enterprise.

Web House Nepal was established in 2017 out of a passion for cutting-edge technology services. We began our journey as a web design and development company in Kathmandu, Nepal. Today, we have stretched out our services beyond web design and development and ventured into creating web apps, software, mobile apps, domains, hosting, digital marketing, social media management, and graphic designing too.

Our team of enthusiastic, energetic, and dynamic designers and developers work together to deliver the most powerful and innovative solutions. We are a team of fully devoted and well-experienced professionals who have never failed to provide an award-winning technology solution to our clients. We work neither to exceed the cost and effort nor to fall behind on the objectives. We are totally concerned about providing 100% project delivery in terms of time, cost, design, and performance.

We make every effort to provide the utmost technology solutions to every business and individual through creative and ingenious inputs and envision leading the global tech world through abstract service in optimizing online visibility and digitalization.

Our Mission

Web House Nepal strives to provide cutting-edge technology solutions to your business and brand through creative and ingenious web design and development, software development, mobile app development, digital marketing, graphic designing and domain &

WORK METHODOLOGY

1

Analysis

Analysis is the first and most important step for any project. This process is initiated with discussion and a few queries to figure out the nature of the desired project and objectives. We too, analyze the design and functionality of the project that the client has visualized. Analysis helps in creating a basis for other work processes.

2

Strategy and planning

On the basis of requirements and objectives, a framework is derived and presented to the client. A detailed discussion is held to figure out if anything is to be added, improvised, or removed. Here we derive a final outline of design and functionality, develop strategy, and create work plans and schedules for mobilizing manpower and resources.

3

Design and Development

As per the finalized strategy and plans, we proceed towards building the project. Our professional designers and developers use every possible technology to deliver 100% result.

4

Test and Deployment

Following the design and development work, we undergo testing or observation from our side and then provide a demo copy to the client for the same purpose. This helps in figuring out any inaccuracies if present. After amending all the errors and weaknesses, if present, the deployment or delivery of the project is done.

5

Maintenance and upgrade

We have a separate team of experts who provide reliable support for the maintenance and upgrade of our projects. The team works to avoid errors and breaches and ensure that the products are up-to-date with the latest technology and deliver effective and efficient output with excellent performance.

LEADERSHIP TEAM

CLIENT REVIEWS

I am extremely thankful for Webhouse Nepal for designing the perfect website for Srijana Sutra. I am very impressed with the designs, along with great functionality. It is a great pride that Webhouse Nepal has proved that international level works can be done in Nepal too. I will be collaborating with Webhouse in near future again for other projects too.

Sampada Malla
Srijana Sutra

"Web House Nepal is very helpful and punctual for the assignment. The design looked much better than the design concept that I originally proposed. Overall, I would recommend Web House Nepal for creative looking website design job."

Krishna Bhatta
ABI College, UK

I am really impressed by the quality of services I received from Web House Nepal for last few years. In this ever changing world of technology, it has provided quality and timely service to my company. It has not only provided great service but provided consultation on best practices for my company. I highly recommend this company for best website design and development.

★★★★★

As my personal experience, I would say that they are very professional when it comes to website design and development. I was impressed with Web House Nepal and management and looking forward to hiring them in the future if any service related to website design. They were very strict in the timely delivery of the project.

★★★★★

I had a bad experience with many Web design companies, but after meeting these guys just turned all to a good experience with Web developer and development company. They run with us to the destination until we reach our satisfaction level. Very Cooperative and supportive even after the completion of design and development. Very good, thank you Raja haru!!! I have a high rating for you based on your works and professional deal at every single step of our projects.
